ARFiDO

RFID HF Staff workplace for:

- tags coding,
- borrowing, returning items

The RFID HF Staff workplace enables to code tags (convert identifiers of the items from barcode to RFID) to borrow, renew and return items with RFID HF tags.

It also enables to convert identifiers of items from barcode to RFID, to borrow, return items with RFID HF tag. The workplace software deactivates tag when borrowing an item, activate the tag when returning an item. Borrowing, renewal and return is recorded in real-time in the Library Management System.

The device can be installed on the table of the staff workplace.

It reads 5 items at the same time.
